

Using manual processes to conduct day-to-day business is no longer acceptable. Collectors must adopt leading-edge technologies that help them capitalize on changes in the marketplace to remain competitive.

The Quandis Skip Trace Solution eliminates the waiting game associated with outsourced vendors or extra searching overhead to effectively get the job done in the shortest amount of time by offering rapid and accurate Skip Trace location results.

Our solution can access several Skip Trace service providers with the click of a button. The emergence of advanced connectivity standards enables Quandis to seamlessly integrate clients with multiple disparate Skip Trace servicing vendors. This eliminates the lengthy, costly custom coding or application rewrites associated with the Skip Trace applications of yesteryear.
