

Quandis offers a direct and automated search of Pacer’s Bankruptcy Case Locator. If your employees are currently searching Pacer manually, let our computers do the work for you. We will return the raw bankruptcy data in spreadsheet or XML form, as well as a hyperlink to a screenshot of the Pacer system itself from which the data was scraped. This gives you the benefit of:

- **Reducing labor costs** by having our computers search Pacer for you
- Results are in a **format that can be imported** into a servicing or case management system
- Providing a PDF image of the Pacer screen for **auditing** purposes

Quandis technology allows us to perform the searches in a mass bulk process. Searches are completely automated and can be processed through one of the following methods:

- HTTPS (Web Services: SOAP or REST): instant results
- FTP File Exchange (MS Excel, Delimited Text): same day results

The information required to search bankruptcy is either one of the following:

- Last name and last 4 digits of a social security number, or
- A full social security number

Efficiently receive the most current information from the U.S. Bankruptcy Court system to determine if an individual has sought protection under federal bankruptcy laws. The Bankruptcy records cover all bankruptcy districts in the United States including voluntarily or involuntarily Chapter 7, 11, 12, and 13 petition filings.

Quandis offers two search types:

Basic Search	Extended Search
<ul style="list-style-type: none"> ∴ Bankruptcy Case Number ∴ Bankruptcy Chapter ∴ State Of Filing ∴ Filing Date ∴ Court Status 	<ul style="list-style-type: none"> ∴ Basic Search Results, plus ∴ Close Reason ∴ Date Closed ∴ Attorney Name ∴ Attorney Contact Info (phone, email, fax) if specified ∴ Trustee Name ∴ Trustee Contact Info (phone, email, fax) if specified

Please note: Not all information may be available for all individuals. In all cases, we will return the same information returned by the Pacer National Case Locator web search.

The Quandis Pacer Bankruptcy Search can literally save you hours of time currently spent doing manual searches. Reduce your workload, increase your efficiencies and improve your data integrity.
