

The Quandis Default Management System is a collaborative solution for aligning lenders, attorneys and all parties involved in the Foreclosure and Bankruptcy process. Increase efficiency and profitability through cutting-edge technology and improved process management. Quandis specializes in data and system integration with servicing platforms, internal systems as well as many vendor networks.

Quandis Default Management System key application features include:

- Highly scalable and secure web-based application
- Industry standard and custom workflow
- Custom dashboards with statistical summary and detailed loan level data
- Easily define and manage user roles, teams, groups and departments
- Create, store and securely transmit custom letters and documents
- Real-time, web service data synchronization with loan servicing systems
- Client and Investor specific performance scoring and reporting
- Instant communications, interactions and information exchanges

Quandis provides a common platform to streamline your process and reduce risk. The flexibility enables both servicers and vendors to collectively manage multiple matters, cases, product types and investor specific requirements.
